MODERN DISPERSIONS, INC. has been an independent compounder of thermoplastic materials since 1967. Products offered include a wide variety of concentrates and compounds. With state-of-the-art compounding equipment, MDI has the ability to process a wide range of polymers and additives.

From two plants, Leominster, MA and Fitzgerald, GA, MDI easily services the plastics industry. Both facilities have rail sidings and are equipped to handle resin in bulk, bags, or boxes. Whether an order is 50 lbs. or 500,000 lbs. it is processed, packaged and shipped to meet customer requirements.

Materials and formulations specified by customers are handled with the utmost care and confidentiality. MDI knows the importance of a close working relationship with the customer in order to assure service of the highest quality.

To provide samples and develop new concentrates and compounds, MDI has a fully equipped compounding lab. The lab is staffed by technical personnel who can assist with questions and requests regarding thermoplastics compounding

Quality control is a priority at MDI. All incoming and outgoing material are checked with a full array of testing to assure all specifications are met.
